OIL & GAS -
ON FIELD PIPE COATING / ON FIELD JOINT COATING

WWW.WIWA.COM

MOBILE COATING EQUIPMENT

Application systems for single or plural component coatings

Technical Features:

Inside pipe coating and lining Ø45mm up to 3000 mm
(or more)

Outside coating Ø50 mm to 3000 mm

Coating thickness: up to 3000µ

Pipe length : Mill >16 m Field > 80 m

Product flow: max. 20 l /min = 5,3 Gal/ min

Material: all fluid material

Pipe joint coating and putty fill material

Field pipeline and joint coating

Service temperature: - 30 to + 50°C

On site repair of both internal and external pipe surfaces

Field application system on skid or truck

Advantages:

High quality system MADE IN GERMANY

Easy to service worldwide at low cost

Extremely versatile systems

Easy to customize and adapted for optimum performance

Heavy duty service due to premium and oversized components

Coating equipment for:

- Epoxy
- Polyurea
- Polyurethanes
